

BLUERANGE Lithium EP2 Grease

High quality grease for use in anti-friction & plain bearings subject to high load

Product code: BREP2

Product Description:

Bluerange Lithium EP2 is a premium quality, multi-purpose lithium soap grease.

Bluerange Lithium EP2 is manufactured from lithium soaps and extreme pressure additives. It is suitable for use in all anti-friction and plain bearings subjected to high load conditions.

Benefits:

- Good mechanical stability
- Good oxidation stability
- Good load carrying capabilities
- Good pump ability
- Good corrosion protection
- Compatible with other greases

Application:

Bluerange Lithium EP2 is recommended for use in highly loaded industrial and automotive applications such as wheel and pump bearings, as well as many other multi-purpose functions. It is suitable for use in high pressure greasing equipment.

Typical Test Data:

Colour	Beige
Appearance	Medium Fibre
NLGI Classification	2
Soap Base	Lithium
Unworked Penetration (IP50)	265-295
Worked Penetration (IP50)	265-295
Operating temperature (°C)	-20 to 140
Drop Point (°C, IP132)	180 min
Water Washout @ 38°C	5% max
Timken OK Load (kg)	20
